

Milan, October 25, 2022

Dear Associates and Associates,

It is with great pleasure that we inform you of the launch of the ninth edition of the Uni.C.A. Prevention Campaign, even richer than previous ones.

As you are well aware, the pandemic situation did not allow us to organize this initiative in the last two years, but now we can return, even if with due caution, to normal life and we, with our Fund, to offer you the opportunity to take care of your health.

We are therefore continuing on the path taken since the establishment of Uni.C.A., which has made prevention its true hallmark, in awareness of its social and health value.

The new Campaign, which sees the setting of the previous edition of 2018-2019 confirmed, is based on screening protocols diversified by gender and age groups (normally used by the scientific community), and has been enriched with specific examinations aimed at the early detection of oncological and cardiovascular diseases related to aging, which are more likely to occur in certain delicate phases of life, such as menopause and andropause.

It is no coincidence that the launch of the Campaign takes place in October, a month in which several days dedicated, globally, to prevention are scheduled.

The examinations contained in the offered check-ups are divided into three successive phases: the first two phases include laboratory tests, specialist examinations, and diagnostic tests; the third phase, on the other hand, includes specific instrumental examinations intended only for those who, based on the results of the first two phases, present conditions such as to suggest further, more "invasive" investigations that, therefore, must necessarily be suggested by doctors.

From an operational point of view, the Campaign will be managed through Previmedical, already Uni.C.A.'s service provider for non-dental health coverage, using the tools already known to all members: with reference to operational aspects, a special operational guide is available to which we refer for all details.

Another important novelty this year is the launch, at the same time as the traditional Campaign, of a prevention initiative aimed at pensioners enrolled in Uni.C.A.: it is a dental campaign that includes a specialist examination, tartar ablation as well as the possibility of access to the agreed fee schedule for all other services. With said initiative, which we hope will be appreciated, we wanted to respond to the needs expressed by our retired members, for whom dental services are not provided within the policies dedicated to them.

The Dental Campaign will be managed by the provider Aon-Pronto Care; again, a special manual, available to interested parties, will explain the operational procedures for accessing the said campaign.

As anticipated, the Cassa's overall Prevention Plan will start on October 25, 2022, and will close on July 31, 2023, with the possibility of booking by June 30, 2023.

We therefore invite you to join our new initiatives, emphasizing once again how prevention is important to improve the quality of our lives, because it allows us to have guidance on how to take care of our bodies, our health.

With best regards.

Uni.C.A. UniCredit Cassa Assistenza
The President
